ELSEVIER

Journal of Virological Methods 49 (1994) 373–375

Journal of Virological Methods

Contents Volume 49

No. 1

Research Papers

J.S. Bootman and P.A. Kitchin (UK)
Reference preparations in the standardisation of HIV-1 PCR – an international collaborative study 1
C. Mary, J.N. Telles, V. Cheynet, G. Oriol, F. Mallet, B. Mandrand and B. Verrier (France)
Quantitative and discriminative detection of individual HIV-1 mRNA subspecies by an RNAse mapping assay 9
F. Condorelli, G. Scalia, A. Stivala, R. Gallo, A. Marino, C.M. Battaglini and A. Castro (Italy)
Detection of immunoglobulin G to measles virus, rubella virus, and mumps virus in serum samples and in microquantities of whole blood dried on filter paper 25
Udaykumar, A. Heredia, V. Soriano, R. Bravo, J.S. Epstein and I.K. Hewlett (USA, Spain)
Enhanced diagnostic efficiency of the polymerase chain reaction by co-amplification of multiple regions of HIV-1 and HIV-2 37
L.N. Sellner, R.J. Coelen and J.S. Mackenzie (Australia)
Sensitive detection of Ross River virus – a one-tube nested RT-PCR 47
D. Bettinger, C. Mougin and M. Lab (France)
Rapid detection of active cytomegalovirus infection by in situ polymerase chain reaction on MRC5 cells inoculated with blood specimens 59
S.D. Blacksell, R.A. Lunt and J.R. White (Australia)
A rapid indirect ELISA for the serogrouping of Australian orbiviruses 67
French Study Group for the Standardization of Hepatitis C virus PCR
Improvement of hepatitis C virus RNA polymerase chain reaction through a multicentre quality control study 79
L.A. Tarassishin and W.C. Russell (UK)
A competitive avidin-biotin ECL dot-blot assay for epitope mapping of monoclonal antibodies (Short Communication) 89
R. French and N.L. Robertson (USA)
Simplified sample preparation for detection of wheat streak mosaic virus and barley yellow dwarf virus by PCR (Short Communication) 93

No. 2

Mini-Review

L.G. Birkenmeyer and I.K. Mushahwar (USA)
Detection of hepatitis A, B and D virus by the polymerase chain reaction 101

Research Papers

S. Kawamoto, K. Ueda, E. Mita and K. Matsubara (Japan)
The packaging signal in hepatitis B virus pregenome functions only at the 5′ end 113
O. Forslund, B.G. Hansson and B. Bjerre (Sweden)
Typing of human papillomaviruses by consensus polymerase chain reaction and a non-radioactive reverse dot blot hybridization 129
V. Barlet, M. Cohard, M.A. Thelu, M.J. Chaix, C. Baccard, J.P. Zarski and J.M. Seigneurin (France)
Quantitative detection of hepatitis B virus DNA in serum using chemiluminescence: comparison with radioactive solution hybridization assay 141
C. Barreau, F.-X. Jousset and M. Cornet (France)
An efficient and easy method of infection of mosquito larvae from virus-contaminated cell cultures 153
B. Van Gemen, R. Van Beuningen, A. Nabbe, D. Van Strijp, S. Jurriaans, P. Lens and T. Kievits (Netherlands)
A one-tube quantitative HIV-1 RNA NASBA nucleic acid amplification assay using electrochemiluminescent (ECL) labelled probes 157
K. Sudo, K. Konno, T. Yokota and S. Shigeta (Japan)
A sensitive assay system screening antiviral compounds against herpes simplex virus type 1 and type 2 169
A. Donn, L.A. Martin and A.I. Donaldson (UK)
Improved detection of persistent foot-and-mouth disease infection in cattle by the polymerase chain reaction 179
B.T. Poulos, J. Mari, J.-R. Bonami, R. Redman and D.V. Lightner (USA, France)
Use of non-radioactively labeled DNA probes for the detection of a baculovirus from *Penaeus monodon* by in situ hybridization on fixed tissue 187
J.K. Kulski (Australia)
Quantitation of human cytomegalovirus DNA in leukocytes by end-point titration and duplex polymerase chain reaction 195
J. Cason (UK)
Strategies for mapping and imitating viral B-cell epitopes 209
R.P. Singh, A. Boucher, D.K. Lakshman and S.M. Tavantzis (Canada, USA)
Multimeric non-radioactive cRNA probes improve detection of potato spindle tuber viroid (PSTVd) 221
H. Kariwa, J. Arikawa, I. Takashima, Y. Isegawa, K. Yamanishi and N. Hashimoto (Japan)
Enhancement of infectivity of hantavirus in cell culture by centrifugation 235

Announcement 245

No. 3

A.A. Heldsinger and T. Antonucci (USA)
An HIV-1 protease screening assay using a non-infectious proviral clone 247
A. Warnes, A.R. Fooks and J.R. Stephenson (UK)
Production of measles nucleoprotein in different expression systems and its use as a diagnostic reagent 257
D.-J. Tsuei, P.-J. Chen, M.-Y. Lai, D.-S. Chen, C.-S. Yang, J.-Y. Chen and T.-Y. Hsu (Taiwan)
Inverse polymerase chain reaction for cloning cellular sequences adjacent to integrated hepatitis B virus DNA in hepatocellular carcinomas 269
V.M. Carn, R.P. Kitching, J.M. Hammond and P. Chand (UK)
Use of a recombinant antigen in an indirect ELISA for detecting bovine antibody to capripoxvirus 285
L. Levy, I.-M. Lee and A. Hadidi (USA)
Simple and rapid preparation of infected plant tissue extracts for PCR amplification of virus, viroid, and MLO nucleic acids 295
M.L. Ng, F.M. Yeong and S.H. Tan (Singapore)
Cryosubstitution technique reveals new morphology of flavivirus-induced structures 305

S.-Y. Chan, I.M. Kautner and S.-K. Lam (Malaysia)
The influence of antibody levels in dengue diagnosis by polymerase chain reaction 315
F. Agnès, J.M. Crance and F. Lévêque (France)
Separate detection of the two complementary RNA strands of hepatitis A virus 323
J. Wu, D.E. Sullivan and M.A. Gerber (USA)
Quantitative polymerase chain reaction for hepatitis B virus DNA 331
B.-S. Yan, L.-Y. Liao, K. Leou, Y.-C. Chang and W.-J. Syu (Taiwan, ROC)
Truncating the putative membrane association region circumvents the difficulty of expressing hepatitis C virus protein E1 in *Escherichia coli* 343
M. Pfeffer, H. Meyer and M. Wiedmann (Germany, USA)
A ligase chain reaction targeting two adjacent nucleotides allows the differentiation of cowpox virus from other *Orthopoxvirus* species (*Short Communication*) 353
M. Urabe, T. Tanaka and K. Tobita (Japan)
Use of competitive PCR to estimate the level of NS gene persisting in MDCK cells which survived productive replication of a mutant of influenza virus A/WSN (*Short Communication*) 361
D.J. Morris, G. Corbitt and E. Crosdale (UK)
Same-day testing for human immunodeficiency virus antibodies (*Short Communication*) 367
